SCHOOL-COMMUNITY COMMITTEES

The Fremont Board of Education, upon recommendation of the Superintendent, shall appoint and utilize lay citizen advisory councils to encourage more involvement from the community served by the school system.

An advisory council's function will be to advise the Superintendent and Board on school policies and procedures. Such councils or committees shall become a link between the community and the school on issues of concern to the school community. A functional advisory council is important to many of the school's programs through review and strengthening of curricula; publicizing and promoting programs; advising on the adequacy and appropriateness of facilities, equipment and instructional need; assisting with organizational activities; and determining community needs.

Upon recommendation of the Superintendent, the Fremont Board of Education may request a designated advisory council to study and report to the Superintendent and Board on assigned topics or issues with which the Board is seeking assistance.

Such councils may be created as needed with the organization, name, and function tailored to fit specific needs. Such council shall cease when the designated mission is reached or when the reason to exist is no longer valid.

Advisory councils' jurisdiction will be limited to advisory status only and will not include any type of administrative function or responsibility.

When the need for an advisory council is determined, the Superintendent shall develop a position paper which describes, for the Board, the make-up of members desired. This paper shall include, but is not limited to, the beginning date, purpose, ending date, procedures for joint meetings, correspondence, etc.

Adopted: November 9, 1987
