PRINTED MATERIALS

The public should be fully and promptly informed concerning plans, activities, and needs of the school system. Information is available for the press and public at all times. To prevent duplication of reports, it is the practice to require that all news items be released through the office of the Superintendent or his designee. Exceptions shall be write-ups of athletic events and Booster Club events of social and special programs, and the Band Parents activities that relate to school only.

Reasonable efforts shall be made to not release information of a personal nature that is not directly related to the school without first obtaining the consent of the individual student and parent or guardian
