# TESTING PROGRAM

The School District will establish and maintain a standardized basic testing program.

The program will emphasize:

1. A qualitative assessment of the educational program of the District for purposes of reporting the overall status of the District and charting the growth of pupils from year to year.

2. Regular reports to the Board.

3. Interpretation and use by the teacher, counselor, and administrator so that the test findings will influence the guidance and counseling of individual children and the development of a high quality curriculum.

The program will reflect the academic growth of pupils according to their mental capacities and to local and national norms, minimize the workload to school personnel in terms of test administration, scoring, interpretation, and use; be adequate and financially feasible; require reasonable training for involved school personnel; and assess the growth of pupils in the basic skills and subjects.

The District Testing Program shall embody those tests required by state law.
