## CORE CURRICULUM - GRADES 9-12

The Board of Education believes that the Fremont School District should provide educational activities and experiences for secondary students within the scope of a designated core curriculum composed of specific course work in selected areas. The Board of Education also believes that all students, grade 9 through 12, should meet the requirements of a mandated program of studies based upon this core curriculum and that each student must successfully complete 80 percent of the prescribed course work within the core curriculum as part of the graduation requirements of this District.
