

**IF YOU HAVE A CHILD LEARNING MATH  
YOU NEED TO READ THIS!**

Do you dread the question “**Can you help me with my Math homework?**” Have you ever told your child “**You will have to ask your teacher because I am not that good at Math.**” Maybe you just wish you could relearn Math so you can better help your child. Well Fremont PTA Council and Sylvan Learning Center have teamed up to give you the **power and ability to help your child!** We are offering a **Free** night of refreshing your Math skills. Forgotten Math is a **Free** two hour seminar consisting of roundtable discussions on topics from Integers all the way through Algebra! So I am sure you are thinking “How boring, listening for two hours to a teacher go on and on about Math.” It is not like that! You will have 20 minute sessions and you choose the topics you wish to relearn! Need to remember **Fractions**? We can help! Cannot remember how to use the **Quadratic Equation**? We will get you squared away! So save the date and come have refreshments and be empowered to help to your child! Did I mention it is **Free**?
